This book is about... ^{who} two boys buy a new computer game. They play as the pods, the enemy ~~is~~ are the Quorks. They found out that the pods had come out of the computer screen. They start a new game and put the pods back in the computer game and they live happily ever after.

I think you should read this book because... the story is exciting and funny at the same time. If you like video games you're bound to like this book.
